

Privacy statement ConsultingKids

Ensuring privacy and protection personal data is very important to ConsultingKids

Only if there is a good reason, we register your personal data. The reason for registering is because it helps us convincing adults of creative power and inspirational ideas of kids, and because it helps us to explain how kids are able to find such great ideas. In this privacy statement we explain you how we use your personal data.

Personal data?

Personal data contains information about you or another person. For example, your name or telephone number. A new law (the General Data Protection Regulation, the GDPR) stipulates that personal data must be protected so that you retain your right to privacy. We think it is important that your personal data is well protected and therefore also comply with the law.

Personal data that we collect

We try to keep as little information as possible of everyone, so that your right to privacy is guaranteed as good as possible. We keep the data in a secure environment, so that only we can access it. We keep the data as long as necessary for us to carry out our work properly.

1. We keep the names, e-mail addresses and telephone numbers of the teachers and schools that we visited to teach. Sometimes they find it fun to take our lesson with a new class and we want to be able to ask them.
2. We keep, during the execution of our assignment, the photos and videos that we make in the classes of the children. Whether we can make the photos and videos, of course, we ask the teacher or parents in advance. The photos and videos we make are stored safely and we use some photos or videos in a PowerPoint to show our client what has happened in the classroom. Before we add those photos and videos, we ask the teacher again if that photo (s) and videos can be used. Our client gets the PowerPoint without the photos and videos of the children. After our assignment is finished, we remove the photos and videos.

3. We keep the names, e-mail addresses and telephone numbers of our clients: companies, organizations and public institutions. We store this information in a secure environment and remain there when we have finished working for them. We think it is important to be able to continue contacting them to help them implement the children's ideas.
4. We keep the data of our employees.

A secure environment...who has access?

Only employees of ConsultingKids have access to the secure environment and will only use the data if necessary for their work.

Is it possible that my personal data is shared with anyone else?

No, data is never sold or shared for commercial purposes. Sometimes like to share a photo or video from the classroom with our client or, for example, on LinkedIn, but only with permission of everyone who is visible in it. Often the school has already arranged something about how to deal with the personal data of children and we always adhere to this. Before we make a photo or video, we also ask whether that is allowed.

I do not want you to save my personal data. What to do?

Everyone has the right to view, modify or remove his or her personal data. And that is also possible at ConsultingKids. You can send an e-mail to info@consultingkids.nl and we will let you know if we keep your data. And if we keep it, what data we keep from you. If you want to be removed from our secure environment, that is always possible.
